SMART ALARM

SECURITY AND MORE ...

SECURITY AND MORE ...

COMPLETE HOME AUTOMATION

Zipato is interactive security and automation service based on cloud technology. Zipato monitors your home security system 24 hour per day and sends instant alerts in case of any incident Additionaly, you can control, customize and automate all power devices in your home or even watch live video from your home wherever you are.

zipato

zipato

BETTER SECURITY

NEXT GENERATION SECURITY SYSTEM

- unlimited number of virtual alarms (partitions)
- up to 233 wireless zones
- easy integration with wired alarm systems (DSC, HoneywelL.)
- remote arm/disarm and get status-info with smartphone from anywhere in the world

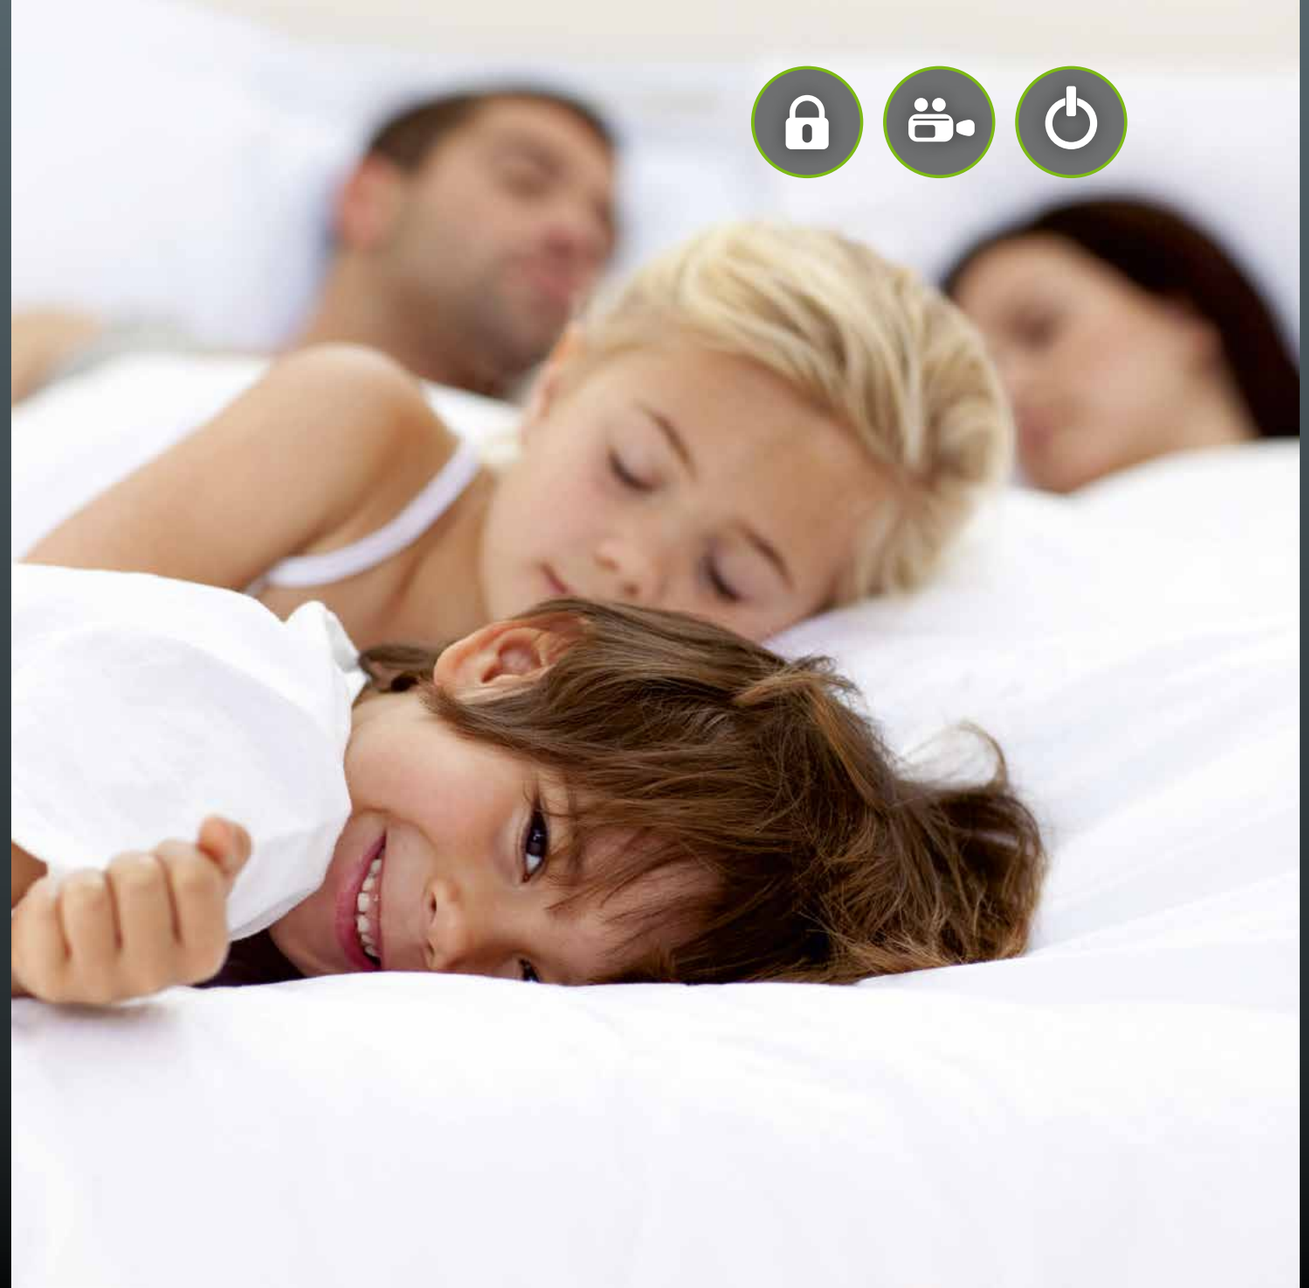
24/7 MONITORED SENSORS

- intruder detection (motion sensors and door/ window sensors!
- fire detection [smoke sensors]
- flood detection (water leakage sensors!
- gas detection [CO sensors)
- panic button
- duress (if someone force you to disarm your system)
- health care (alarms you in case of missing actions during particular time e.g. motion, door opening, laying on beLl

SECURITY AUTOMATION

- includes arm/disarm commands in automated scenes and rules
- easy setup and configuration over web based interface
- uses same sensors for security and automation purposes
- automatically stops the flow of water or gas when leaks are detected

zipato



24/7 MONITORING AND ALERTING SYSTEM

Zipato central station monitors your system 24 hours per day and triggers Immediate alarms to security guards, police, fire department or medical emergency.

REMOTE ARM/DISARM

Arm/Disarm your system quickly wlth your smartphone, wherever you are.

MONITORED WATER/FLOOD SENSORS

Get alerts of water leaks early to avoid potential severe water damage.

CUSTOM NOTIFICATIONS

Zipato can send e-mails or text messages, as well as video dips whenever important activity occurs, such as a child arriving home from school, housekeeper arriving at your home, medicine cabinet being open, plus more.

VANDAL PROOF

Being monitored 24 hours per day by central station which triggers lmidlate alarm in case of connection cut, Zipato represents virtually undefeatable home security system.

zipato

ENERGY MONITOR

Zipato enables you to see exactly how much electricity is being used in your whole home or per each deviceright now, online or on your mobile.

ANALYZE AND COMPARE

Zipato will provide you with advanced historical reports and statistics of your energy consumption so you can analyze it and even compare it to average in your area.

COST PREDICTION

Zipato shows you how much your electricity use is going to cost you every day and every month, unless you change your common consumption behaviour:

REAL TIME NOTIFICATIONS

Zipato will soon learn what is your average usage for concerned time periods, and if its suddenly gets higher you will get a message that something has been left on {like a light bulb or an appliance on stand-by}.

WHEN YOU LEAVE THE HOUSE

It will show you exactly how much electricity you are using even when you're not at home. It can alert you if your consumption is more than average. It can automatically switch off the TV instead of leaving it on stand-by.

WHEN YOU GO TO SLEEP

You can save by switching off an appliance or two ... You'll be asleep and you won't be needing them anyway.

zipato

zipato

SMART LIGHTING

LIGHTING AUTOMATION IN EVERY HOME

- easy installation of wireless modules and even easier configuration online
- in-wall and plug-in lighting modules pre-setup far even easier installation
- compatible with any wall plates

REMOTE DIMMING AND ON/OFF SWITCHING WITH SMARTPHONE OR WEB PC

SAVE ENERGY AND GET MORE COMFORT

- make your system automatically turn lights on at sunset and off at sunrise
- create advanced event based rules configuration with ease
- unlimited number of scenes supported

SECURITY AUTOMATION

- turn lights on during emergencies
- auto-pilot lighting programs for intruder distruction while home is empty

zipato

zipato

SMART THERMOSTAT

SAVE ENERGY AND FEEL MORE COMFORTABLE

- TOTAL CONTROL OVER HOME CLIMATE CONDITIONS
  - control unlimited number of custom zones (thermostats) in your home, separately
  - control temperature in each zone by using standard radiators and air-conditions
  - control humidity in each zone by using standard humidifiers and dehumidifiers
- REMOTE CONTROL OVER TEMPERATURE AND HUMIDITY IN ALL ZONES WITH ANY SMARTPHONE
- AUTOMATE TO SAVE ENERGY
  - easy to use programing scheduler, accessible through web browser
  - use internet weather feeds to program your home climate conditions
  - include your climate control in your own automation scenarios together with security system, lighting, shades ...
  - get notifications and automate actions in case of over-temperature events or door/ window openings

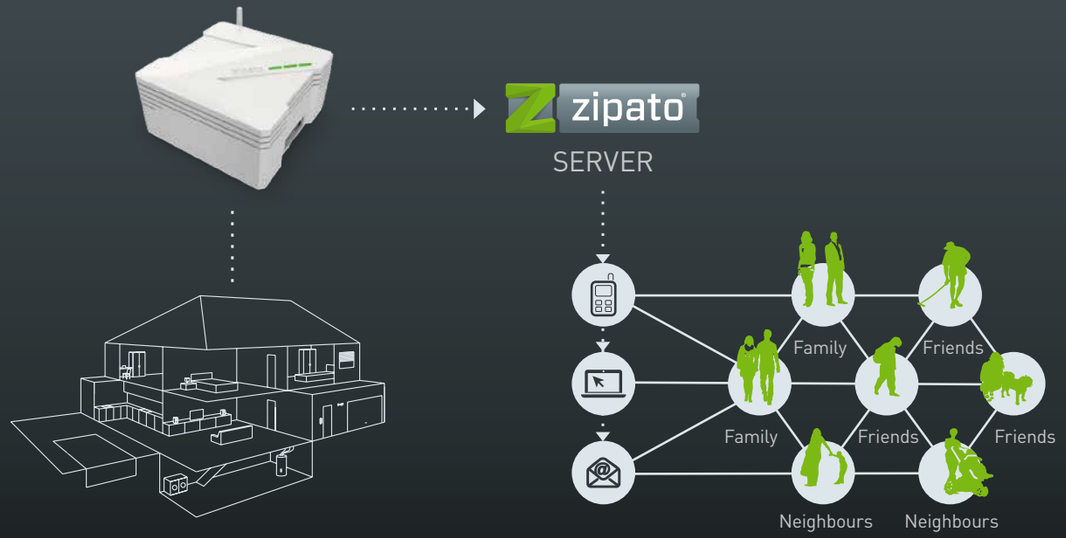
zipato

zipato

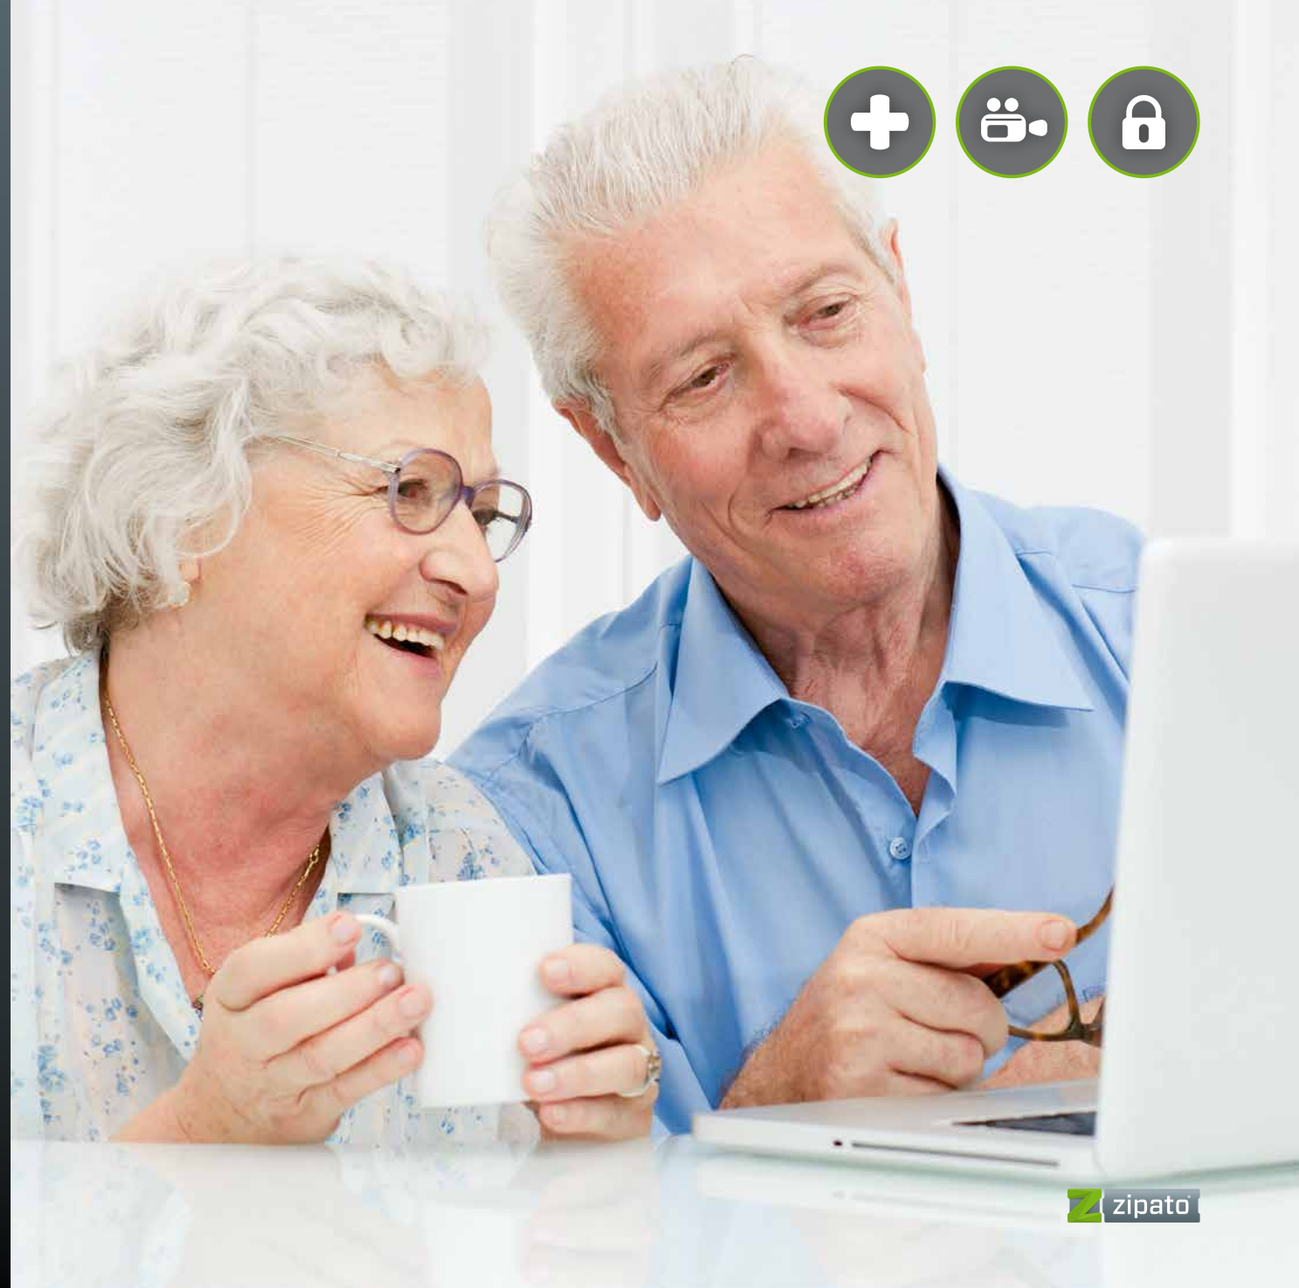
SMART CAREGIVING

WHOLE GROUP OF CAREGIVERS INSTEAD OF ONE, GIVES MORE RELIABILITY AND PEACE OF MIND

By using different sensors and mobile technology, Zipato system can monitor all activities of loved ones as well as provide the information and alerts to the whole group of care members according to its custom configuration. This way families share the care taking responsibilities between siblings, children, trusted friends, paid professionals, neighbours and other caregivers included in the caregiver network. It is a much more dignified and cost-effective solution than assisted living facilities.



zipato



zipato

BLINDS, SHUTIERS, LOUVRES, SHADES, CURTAINS AND MORE ...

CONTROL THEM WITH EASE

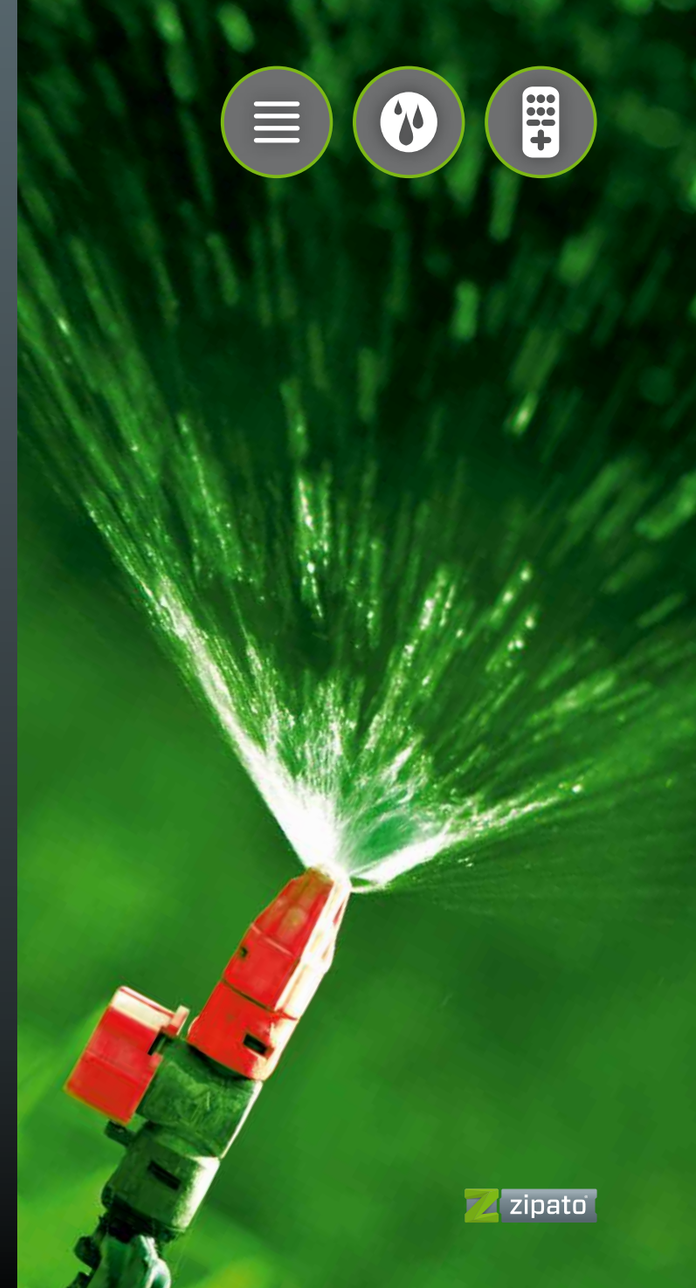
- easy installation in every home, using pre-configured wireless modules
- controlling sun shades with any smartphone, from anywhere in the world
- automating motors by using fun and easy programing tool online
  - set sunrise and sunset timers for a fully automated solution
  - automate shades in accordance to solar radiation, time of the day, or wind speed
  - add sun shading into home scenarios together with lights, climate, and other things ...

zipato

IRRIGATION

MOST ADVANCED IRRIGATION PROGRAMING ON THE MARKET

Let Zipato completely manage your garden irrigation requirements. Control almost unlimited number of irrigation zones while at the same time each irrigation zone can have unique settings. Use advanced programing options online to set up perfect irrigation process. Save energy by automating irrigation in accordance to environmental conditions by using weather forcast obtained from Internet. Include irrigation system in your custom home scenarios.



zipato

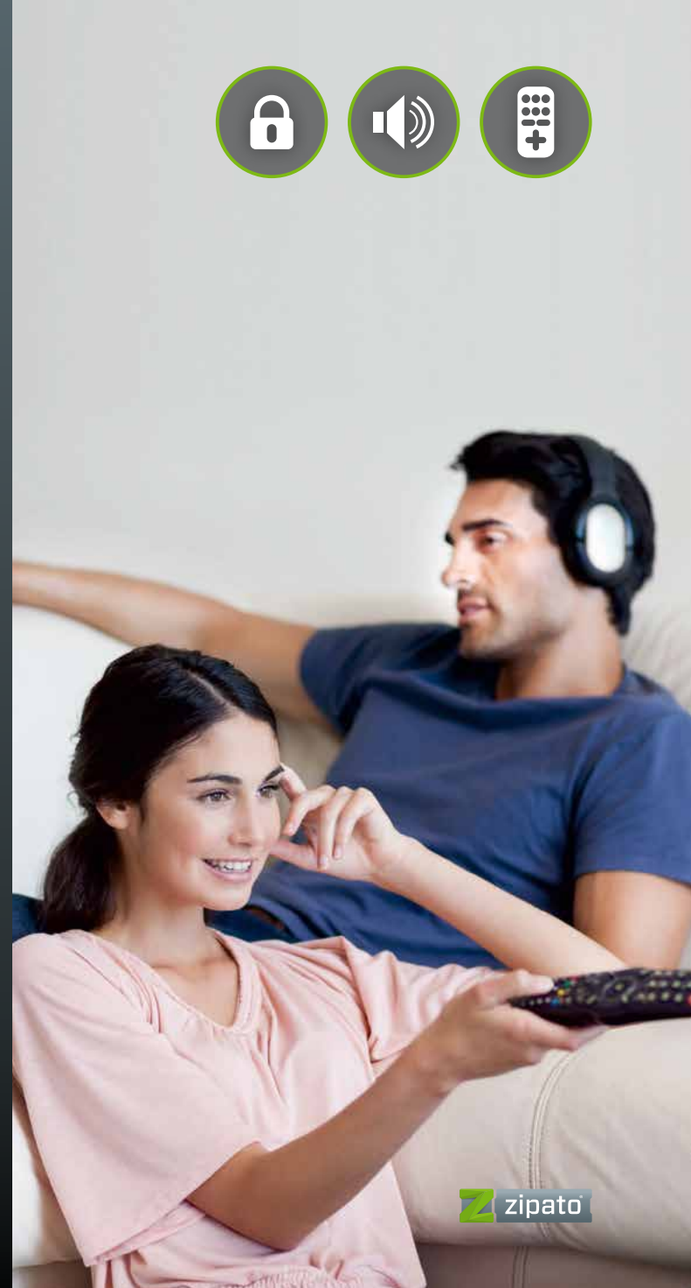
ACCESS CONTROL

- remotely lock/unlock your door over any smartphone
- remotely open/close your garage door or gate over any smartphone
- use RFID keyfobs to open doors and get detailed statistics about multiple exits/ entries
- get video notification when someone opens the door
- automate doors/locks using scenarios and event based programing tool
- event trigger when each user lock-code is entered
- automatically unlock doors in the event of an emergency

zipato

MULTIMEDIA

- remotely control audio/video equipment with any smartphone
- automatically turn on favorite shows when they air and get alerts
- automatically turn off AN equipment at pre-set time or when you are leaving
- automatically turn on equipment to discourage intruders when home is unoccupied



zipato

VIDEO MONITORING

- stay in touch with your home wherever you are
- access live and recorded video via smartphone or Internet
- use any standard IP camera- ONVIF
- get email and sms notifications with pictures and live video attached
- remotely adjust pan-tilt cameras to get better view
- create motion detection based video recording and notification with ease
- use video camera to avoid false alarms

zipato

AUTO-PILOT

PUT YOUR HOME ON AUTOPILOT TO DISCOURAGE BURGLARS WHILE IT'S EMPTY

With Zipato, home security and home automation is integrated together, making the home seems intelligent. For example, movement in the garden can cause an exterior light to turn on and a warning message to play on the outdoor speaker. Furthermore, in Vacation Mode, the lights, TV and radio can be turn on at different but similar times each day to replicate your normal usage pattern so it looks like you're home even when you're not.

zipato

SCENES

ADJUST EVERYTHING IN YOUR HOME BY A SIMPLE CLICK ON THE BUTTON

Combine several commands into one button so that you can create the exact mood or environment with one button press. For example, a "Welcome Home" scene can create an exact environment with evening lighting, floor heating, music and blinds all adjusted to your desired settings. Tie that scene to the "Alarm Disarming" event just for the hours 5.00-9 .00pm and you don't even need to press a button when you come home.

zipato

SCHEDULERS AND TIMERS ONLINE

EASY ONLINE TOOL ALLOWS COMPLETE CUSTOMIZATION OF HOME SYSTEM

Use advanced scheduler to think and do things instead of you. Any series of commands can be easily programmed with a timer function. You can decide when those events will be run. An "Evening Lighting" home timer might lower the blinds, adjust the floor heating and turn on the garden and entry lighting. This timer can be adjusted by the home owner to run at 4.30pm in winter and 7.00pm in summer. Or simply set the timer to a given time before sunset so the timer automatically follows the seasons.

zipato

RULE CREATOR

EASY ONLINE TOOL ALLOWS COMPLETE CUSTOMIZATION OF HOME SYSTEM

- Intuitive graphical programming tool eliminates the need for complex programming or cryptic computer code.
- Online tool so you can add or change something in you configuration whenever you want and from anywhere In the world.
- No programing skills required.

EVENT TRIGGERS CAN BE:

- Conditions (many)
- Status change of any device
- Absolute time
- Sunrise/sunset [with offset]
- Received e-mails
- Security panel events
- By matched infrared
- Recurring at regular second/minute intervals
- Event Actions

IN RESPONSE TO EVENT TRIGGERS, FOLLOWING ACTIONS (AND MORE) MAY BE PERFORMED:

- Send lighting control signals
- Send email
- Run a script
- Trigger another event
- Media Player functions
- Web Camera functions

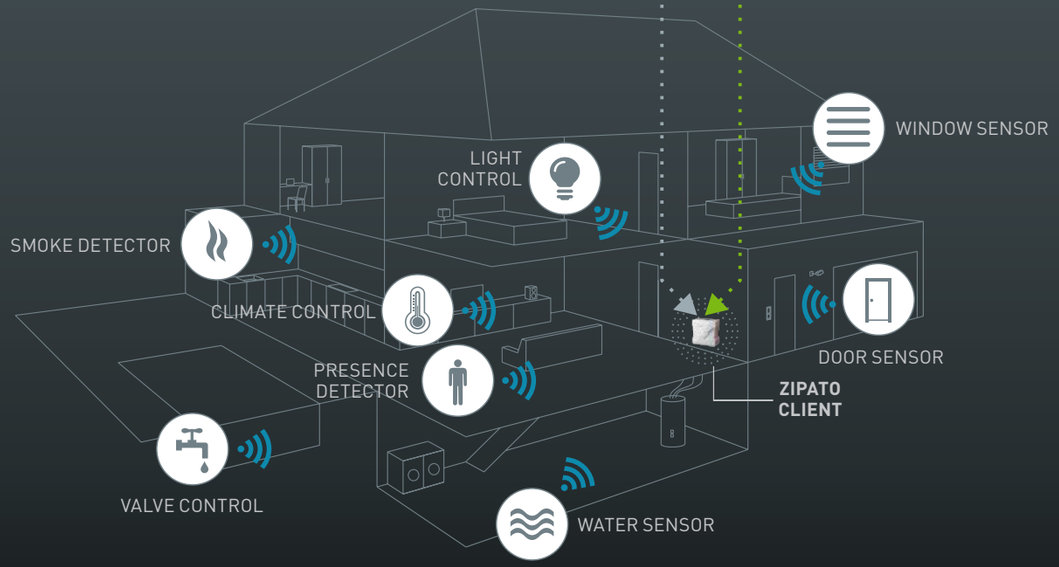
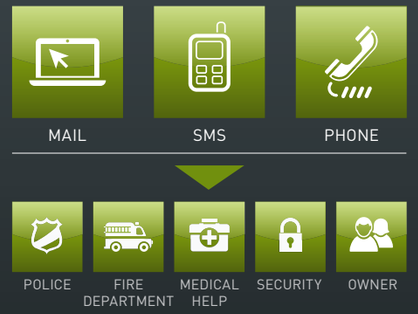
HOW IT WORKS



ALERTING 24/7

YOU WILL NEVER MISS ANYTHING



Zipato monitoring station provides 24-hour MAIL, SMS or PHONE alerting service to anyone you want.

CONTROL YOUR HOME

ANYTIME, FROM ANYWHERE IN THE WORLD

From almost anywhere on the road, your office or the beach, you can keep track of your home easily. Zipato service is accessible through multiple user-friendly interfaces including mobile phones, Web browsers and tablets.

ZigBee® WAVE® KNX® enocean®

zipato

ZIPABOX
SMART HOME CONTROLLER

SMART IN EVERY WAY:

- Smart design allows table top, on wall and din-rail placement
- Smart architecture allowes easy upgrade simply by snapping additional modules
- Smart cloud support allowes easy installation and configuration

MAKES EVERY HOME SAFE,
COMFORTABLE AND ENERGY EFFICIENT.

Supporting the most commonly found protocols in home and building automation systems today and in future (i.e. Zig Bee, ZWave, KNX], Zipabox connects houndreds of various automation devices available on the market joining them into a single Zipato network.

zipato

zipato

ADDITIONAL MODULES:

POWER MODULE
Measure up to 4 electrical circuits in a real time.

KNX MODULE
Allows integration of Zipabox into KNX network.

433 MHZ MODULE
Connect low cost automation devices based on various protocols on 433Mhz.

BACKUP MODULE
24hours uninteruptable power supply, shock sensor, RS 232, temperature meter and USB for 3G backup dongle.

SECURITY MODULE
Connect hard wired security sensors directly to Zipabox. Anti masking, tampering, power supply...

ZIG BEE MODULE
Add ZigBee compatible devices to your Zipato network.

SERIAL MODULE
Interconnect with an existing security alarm system or send RS232/485 messages.

ENOCEAN MODULE
Integrate self powered wireless devices based on EnOcean standard.

P1 MODULE
Connection of external electricity meters by using P1 interface.

POWER MODULE EXTENDER
Extends powermodule in order to measure up to 4 more electricity circuits.

3G USB STICK
Plug in stick for 3G backup connectivity.

AMPER METER CLAMP
AC current sensor with DC male plug 5.5*2.1mm for power module and power module extender.

zipato

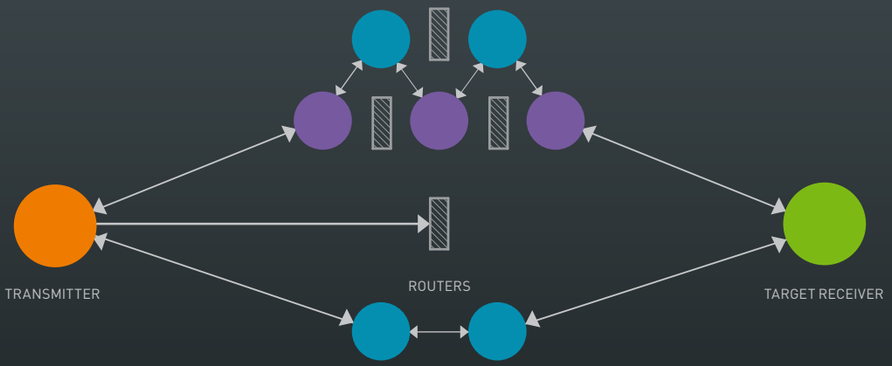
SECURE AND INNOVATIVE:

TWO-WAY, MESH WIRELESS NETWORK

MESH NETWORK: MORE THAN ONE WAY TO COMMUNICATE

REGULAR TWO-WAY NETWORK

TWO-WAY MESH NETWORK



The Zipato radio system finds new ways of transmitting the radio signal. To be specific: always the best way. Sometimes it leads directly to the target receiver and sometimes it is forwarded via another receiver- depending on which receiver is currently best receiving the radio signal. The re-routing technology makes this possible. Your benefit: always the most reliable radio connections.

zipato

SMART ALARM START PACKAGE

24/7 SECURITY MONITORING INCLUDED

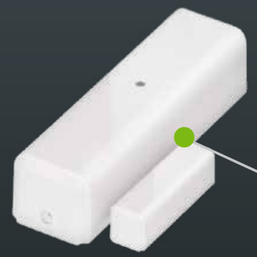
CONTAINS ALL YOU NEED TO START:

ZIPABOX

Zipabox is a next-generation automation controller that lets you control all your home electronics. Most often it uses simple, reliable, low-power radio waves that easily travel through walls, floors and cabinets, but it can also use various hard wires to connect all your home electronics.

MOTION SENSOR + TEMPERATURE METER

This motion detector detects the presence of a person in a room and measures temperature of the room. It sends the information to Zipabox.



MAGNETIC DOOR-WINDOW SENSOR

The Door/Window Magnetic Contact is designed to detect unauthorized entry into a home or other area. It consists of a wireless transmitter and a magnetic block.

RFID KEYPAD MINI

The RFID Keypad allows you to access your home, arm or disarm your security system, or run automation scenario just by touching it with the RFID key tag.

zipato

ADDITIONAL ACCESSORIES:

Use your smart alarm system to control your lights, climate, shades and everything. Supporting hundreds of various devices Zipato gives you the possibility to select the perfect solution for your needs.

MULTISENSOR DUAL
Get info about the activity in any room, as well as the current room temperature.

MULTISENSOR TRIO
Door/Window sensor, temperature meter and illuminance meter in one.

MULTISENSOR QUAD
Door/Window sensor, temperature meter, illuminance meter and presence detector in one.

DOOR/WINDOW SENSOR
Get info about any door, window or cabinet opening wherever you are.

MINI KEYPAD RFID
Access your home, arm/disarm your security system or run automation scenario.

RFID KEY TAG
Small, suitable as key ring.

MM SWITCH DOUBLE
Small, invisible, controlls two electical circuits and measure the electricity consumption of both.

IN-WALL ROLLER SHUTTER
Small, invisible, controlls, roller shutter or any other motor.

MM DIMMER
Small, invisible dimmer with energy consumption metering.

RGBW BULB
Control color and intensity of home lights by just using your smartphone.

FLOOD SENSOR
Get early alarm in case of water leakage.

PLUG-IN SWITCH WITH METER
Control electrical socket and see how much electricity is being used.

WIRELESS RADIATOR VALVE
Controling radiator valve remotely.

SMOKE DETECTOR
Safeguarding your home from fire.

IR EXTENDER
Control your air conditioner or any other IR controlable equipment.

ZIPATO TABLET
Easiest and most attractive way to control any home.

MONITORING CAMERA
Stay in touch with you home wherever you are.

DOOR LOCK
Automatic door lock allows remote full access control wherever you are.

BETTER SECURITY

- arm and disarm your security system
- check statuses of the security zones
- see the list of the alarm events
- control unlimited number of virtual alarms

ENERGY SAVING

- check the current electricity consumption of each device
- control your heating and cooling, in each room separately
- check the cumulative consumption of every electrical device

MORE COMFORT

- full control from one place
- control your lights and shades from the one place
- welcome scenario when coming home
- goodbye scenario when leaving your home

zipato

WHY ZIPATO?

Features like easy installation, configuration and upgrade, reliability and robustness, speed, compatibility and flexibility in operation with external products, inter-system and applicability are part of the main characterstics of Zipato system.

INNOVATIVE
Based on cloud technology.

OPEN
Support global standards.

SIMPLE
Wireless, pre-configured devices.

ECONOMICAL
Powerfull central system requires less additional components.

HIGH-PERFORMANCE AND DEPENDABLE
Mesh network, two way, 24/7 support service.

FUTURE-PROOF
Both Zipabox and Cloud are extremely easy to upgrade.

GOOD VALUE
Combining security and safety with energy management saves costs today and in the future.

EVERYONE PROFITS
Users and building owners as well as installers and planners.

ZIPATO IS A SMARTER WAY TO PROTECT YOUR HOME, MAKE IT MORE ENERGY EFFICIENT AND CONVENIENT.

we make every home smart
